TOWN OF JEFFERSON  
BUILDING ORDINANCE

**Section 11. Definitions**

Accessory Structure: a structure which is incidental and subordinate to the principal structure.

Addition: an increase in the floor area or volume of a structure.

Alteration: the change or rearrangement in the structural parts or in the means of egress.

Commercial Structure: a structure, other than a “home occupation”, the intent and result of which activity is the production of income from the buying and selling of goods and/or services, exclusive of rental and residential buildings and/or dwelling units.

Duplex House: A structure in which two separate dwelling units are located, each with their own separate entrance/exits, sleeping quarters and kitchen facilities.

Expansion of a Structure: an increase in the floor area or volume of a structure, including all extensions such as, but not limited to: attached decks, garages, porches and greenhouses.

Expansion of Use: the addition of one or more months to a use’s operating season; or the use of more floor area or ground area devoted to a particular use.

Foundation: the supporting substructure of a building or other structure excluding wooden sills and post supports, but including basements, slabs, frost walls, or other base consisting of concrete, block, brick or similar material.

Habitable Structure or Space: A structure or an area in a structure for living, sleeping, eating or cooking. Bathrooms, toilets, closets, halls, storage or utility spaces and similar areas are not considered habitable spaces.

Height of a Structure: The vertical distance between the mean original grade at the uphill side of the structure and the highest point of the structure, excluding chimneys, steeples, antennas and similar appurtenances which have no floor area.

Home Occupation: an occupation or profession which is customarily conducted on or in a residential structure or property and which is: 1) clearly incidental to and compatible with the residential use of the property and surrounding residential uses; and 2) which employs no more than two (2) persons other than family members residing in the home.

Increase In Nonconformity of a Structure: any change in a structure or property which causes further deviation from the dimensional standard(s) creating the nonconformity such as, but not limited to, reduction in water body, tributary stream or wetland setback distance, increase in lot coverage, or increase in height of a structure. Property changes or structure expansions which either meet the dimensional standard or which cause no farther increase in the linear extent of nonconformance of the existing structure shall not be considered to increase nonconformity. For example, there is no increase in nonconformity with the setback requirement for water bodies, wetlands, or tributary streams if the expansion extends no

TOWN OF JEFFERSON  
BUILDING ORDINANCE

further into the required setback area than does any portion of the existing nonconforming structure. Hence, a structure may be expanded laterally provided that the expansion extends no closer to the water body or wetland than the closest portion of the existing structure from that water body or wetland. Included in this allowance are expansions, which infill irregularly, shaped structures.

Lot Area: an area of land in one ownership, or one leasehold, with ascertainable boundaries established by deed or instrument of record, or a segment of land ownership defined by lot boundary lines on a land subdivision plan duly approved by the Planning Board and recorded in the Lincoln County Registry of Deeds, or the total horizontal area within the lot lines.

Manufactured Housing/Mobile Home Unit: structures, transportable in one or two sections, which were constructed in a manufacturing facility and are transported to a building site and designed to be used as dwellings when connected to the required utilities, including the plumbing, heating, air conditioning and electrical systems contained therein and otherwise defined in 30-A M.R.S.A. Section 4358(1).

Minimum Lot Width: the closest distance between the sidelines of a lot.

Multi-Family Dwelling: a residential structure containing three (3) or more residential dwelling units.

Non-Conforming Lot: a single lot of record, which, at the effective date of adoption or amendment of this Ordinance, does not meet the area, frontage or width requirements.

Principal Structure: a building other than one which is used for purposes wholly incidental or accessory to the use of another building or use on the same premises.

Public Road/Highway: one which is maintained by state or local governments.

Non-Public (Private) Road: one which is not maintained by state or local governments but is maintained by private individuals or groups/associations of such individuals residing on said road and upon which there are two or more residences.

Recreational Vehicle: a vehicle or an attachment to a vehicle designed to be towed, and designed for temporary sleeping or living quarters for one or more persons, and which may include a pickup camper, travel trailer, tent trailer, camp trailer and motor home. In order to be considered as a vehicle and not as a structure, the unit must remain with its tires on the ground, and must be registered with the State Division of Motor Vehicles.
