

SPECIAL NOTICE:

Fiber Optic Broadband Service coming to Jefferson

In Spring 2022, LCI Fiber Optic Network (LCI) and the State of Maine were awarded a federal National Telecom and Information Administration (NTIA) Grant to build out a blazing fast (*up to a gigabit!*) fiber optic broadband network to serve approximately 500 addresses in Jefferson that were considered to be UNSERVED (i.e., a location with access to broadband speeds less than 50 Mbps download and 10 Mbps upload).

Your address may be one of the locations included in this grant project area*

**** not all roads in Jefferson are eligible under the federal grant guidelines ... but you may still be able to access fiber optic broadband service under LCI's standard installation terms.***

Work on the new fiber network has already begun:

- Network engineering design and environmental assessments – ***completed***
- Purchase and renovation of 39 Washington St. building – ***near completion***
 - It will house our network distribution equipment, and
 - the LCI Customer Service Center and showroom
- Pole permitting and make ready – ***underway***
- Placement of fiber lines on poles – ***beginning Spring 2023.***
- Fiber drop lines connected to individual homes - ***beginning Summer 2023.***
- First installations and connections for subscribers – ***beginning late Summer/Early Fall 2023***

Please NOTE that the earliest possible installation for new subscribers will be ***late Summer/early Fall.***

Please be patient ... BUT don't wait.

To reserve your spot on the installation schedule ...

APPLY NOW!

For all the details & to apply online (*you pay nothing at this time & it only takes minutes*)
