Shoreland Zone: The land area located within Two Hundred and Fifty (250) feet, horizontal distance, of the normal high-water line of any great pond or river; within 250 feet of the upland edge of freshwater wetland; or within One Hundred (100) feet, horizontal distance, of the normal high-water line of a stream.

Be advised that if your project (e.g., shoreline stabilization) is within 100 feet of a brook, stream, lake, river, wetland, great pond, or other waterbody, it probably requires a Natural Resources Protection Act Permit-by-Rule (PBR) from the Department of Environmental Protection **before** work begins. Some of the work that requires a PBR are: soil disturbance, grading, filling (with any material), beach construction or repair, dredging, draining water from or discharging water to a waterbody, bridge or culvert crossings, permanent wharves, docks or moorings, most retaining wall construction or repair and any shoreline alteration or disturbance.
